CHRISTIAN PAJE

SOFTWARE ENGINEER | FULL-STACK DEVELOPMENT | AI-DRIVEN SOLUTIONS

Caloocan City, National Capital Region, Philippines | christianrpaje.work@gmail.com | +63 961 600 5842 | linkedin.com/in/work-w-christian-paje

PROFESSIONAL SUMMARY

Software Engineer with experience building and maintaining full-stack applications, RESTful banking solutions, SSO-RBAC systems, and API-driven KYC onboarding workflows. Skilled in Java, Spring Boot, React, RESTful APIs, JavaScript, Python, database management, and software quality assurance. Experienced in Agile environments, credit workflow processing, and AI chatbot integration using Spring AI and MCP, alongside AWS cloud deployment and Docker containerization. Uses AI-assisted development tools to accelerate delivery while applying structured validation, testing, and debugging to maintain high solution quality and reliability.

TECHNICAL SKILLS

Programming: Java, JavaScript, Python

Backend: Spring Boot, RESTful APIs, Object-Oriented Programming (OOP)

Frontend: React, AngularJS, UI/UX principles, Responsive Web Design

Databases & Search: Apache Cassandra, Apache Solr, MongoDB, MariaDB, Database Management

Cloud & DevOps: AWS, Docker, Git, GitHub

Quality & Delivery: Quality Assurance, Manual Testing, Automated Testing, Debugging, Agile, SDLC

Architecture & Integration: Microservices, Event-Driven Architecture

AI & Automation: AI-Assisted Development, Agentic AI Workflows, Process Automation, API Integrations

PROFESSIONAL EXPERIENCE

SOFTWARE VENTURES INTERNATIONAL

Software Engineer | February 2025 – Present | Pasig, National Capital Region, Philippines

- Develop and maintain banking solutions aligned with complex business logic and operational requirements—including a credit card application workflow engine for a well-known bank that handles data sanitization, transformation, and automated processing—supporting system reliability, scalability, and organizational standards.
- Build and enhance full-stack applications using Spring Boot and React, including RESTful services for the SSO-RBAC (Single Sign-On and Role-Based Access Control) platform used company-wide to manage authentication, authorization, and core business flows.
- Engineer RESTful APIs and front-end interfaces for an enterprise Know Your Customer (KYC) system used for user onboarding, identity verification, database enrollment, and integration into third-party commercial services.
- Develop an AI chatbot for an Enterprise Data Warehouse leveraging Event Driven Architecture, Spring AI, Retrieval-Augmented Generation (RAG) architecture, and the Model Context Protocol (MCP).
- Accelerate software delivery using AI-assisted development tools while conducting thorough validation, manual and automated testing, and debugging to ensure high solution quality.
- Collaborate with developers, QA testers, and business stakeholders to design cloud-aligned system architectures using AWS services, third-party integrations, and proprietary technologies.
- Onboard and mentor new hires by assisting with environment setup, conducting Software Quality Assurance (SQA) training, and serving as an activity panelist.
- Completed specialized training in System Design & Architecture, AI Voice Platform Specific Integration, and Prompt Engineering to enhance system scalability and AI-driven solutions.

SOFTWARE VENTURES INTERNATIONAL

Programmer Trainee | October 2024 – February 2025 | Pasig, National Capital Region, Philippines

- Completed structured training in JavaScript, Python, and Java, with practical application of object-oriented programming (OOP), RESTful APIs, concurrency, UI/UX principles, and database management.
- Gained practical experience in quality assurance testing, PowerBI, AWS cloud deployment and other AWS products, and Docker containerization.

DATEM INCORPORATED

Mechanical Engineer | November 2023 – March 2024 | Quezon City, National Capital Region, Philippines

- Reviewed mechanical plans, specifications, equipment provisions, and MEP layouts while coordinating discrepancies, approvals, and proper installation of approved materials.
- Monitored contractors, suppliers, schedules, inspections, cost proposals, and commissioning activities to support timely, safe, and cost-efficient project delivery.

IPMA: INTERNATIONAL PROJECT MANAGEMENT ASSOCIATION

Internship Trainee | August 2021 – September 2021 | Philippines

- Completed project simulation workshops aligned with the IPMA Individual Competence Baseline (ICB) 4.0 and project management practices.

EDUCATION

UNIVERSITY OF THE PHILIPPINES OPEN UNIVERSITY

Post Graduate Diploma, Computer Science | September 2024 – December 2026

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES

Bachelor of Science – Mechanical Engineering | June 2018 – September 2022

CERTIFICATIONS

- Crash Course in Python — Google Coursera
- Introduction to Git and GitHub — Google Coursera
- Web Programming with Python and JavaScript — Harvard University
- JavaScript Algorithms & Data Structures — freeCodeCamp
- Responsive Web Design — freeCodeCamp
- Introduction to Computer Science with Python — Harvard University
- Introduction to Computer Science — Harvard University

PROJECTS PORTFOLIO

- **Notable Finance** — A personal finance desktop application for windows and mac using ElectronJS designed to simplify expense tracking, income management, account monitoring, and monthly budgeting. It features an AI-powered financial assistant that allows users to record transactions through natural language instead of manually entering data. The assistant also includes an optional personality mode that can deliver playful commentary—such as roasting users for their spending habits—to make personal finance management more engaging.
  GitHub: https://github.com/work-w-chrstnrpj/Notable_Finance
- **SyncStock** — An open-source inventory management application built using Django and React. Designed to provide a modern and maintainable solution for managing inventory, stock records, and related business operations through a full-stack web architecture.
  GitHub: https://github.com/work-w-chrstnrpj/syncstock
- **Lumina Studio** — A free, browser-based image editing and restoration platform designed to make photo enhancement tools easily accessible online. Users can edit, improve, and restore images directly from their browser without installing additional software.
  Live Website: https://luminastudioweb.app/

HONORS & AWARDS

- R.A. 7687 Scholarship Awardee (2018–2022) — Department of Science & Technology – Science Education Institute, May 2018
- CareerUPrime Scholarship Awardee — Children International, Apr 2022
- Best Thesis Award – Mechanical Engineering Department — PUP Mechanical Engineering Department, Sep 2022
- President's Lister — Polytechnic University of the Philippines
